Progress as tradition

Innovation, passion and precision have been guiding our product developments for more than 110 years. Light, shading, air conditioning, energy, security, door communication and multimedia – JUNG systems provide the appropriate solution for every requirement.

We have a global presence with around 1,700 employees, 21 subsidiaries and 80 representatives. We consciously combine this internationality with close ties to the headquarters of our family business in Schalksmühle. A future always needs a past – this principle finds expression in our founder's villa with its newly-built annexe. The previous home of our company founder,

Albrecht Jung, has found a new purpose as a meeting and service centre. The minimalist design of the building, the careful selection of the materials used in the renovation and new building as well as the use of renewable energies reflect the standard we also apply to our products: future-oriented building technology with an outstanding design.

More information can
be found here:
www.jung.group/villa

Company founder Albrecht Jung

Quality – Made in Germany

Products and systems from JUNG are appreciated worldwide as a guarantee for reliable high quality. Developed and produced in our works in Schalksmühle and Lünen, they unite innovation, functionality, long life and aesthetics.

With production being carried out in Germany, we focus on sustainable development and manufacturing processes, short logistics routes as well as energy efficiency. Each year, millions of socket inserts and flush-mounted units for switches leave our factories in Sauerland. In addition to production on fully-automatic assembly lines, many production steps are carried out manually. For example, all brass

switches are brushed by hand in our in-house metal works to make them almost unique. In order to reproduce the impressive colour depth of the Les Couleurs® Le Corbusier, JUNG has the switches in the LS 990 range painted by hand using a special process. This produces the matt, non-slip surface. Precision in the manual processing and high design quality ensure that our products are high-grade and robust.

LS range – Time for genuine classics

There are things that never go out of fashion: genuine classics like the designs of the LS range. With their square basic shape, straight lines and clear design language, they fit timelessly and elegantly into any ambience. The selection of high quality materials and surfaces provides all possibilities to realise personal furnishing styles. From surface-mounted installation to individual lacquering to flush-mounted wall and furniture installation.

LS 990

SWITCH / SOCKET COMBINATION

in matt snow white

ROTARY DIMMER

in anthracite

MOTION DETECTOR

in aluminium

The LS 990 flat switch is the classic among light switches. A slim frame and a maximum operating surface characterise the reduced design. In timeless colours, elegant matt lacquering, made of stainless steel, aluminium, brass, chrome-plated or with exclusive gold

plating – with its timeless aesthetics, the LS 990 has been impressive for more than 50 years. In addition to its purist design, it is mainly its wide range of functions that make the range the favourite whenever high-quality furnishing concepts are required.

LS 990 in Les Couleurs® Le Corbusier

SCHUKO® SOCKET

in 32013 gris clair 31

JUNG sets accents with LS 990 in Les Couleurs® Le Corbusier. What is so special about this colour system: Le Corbusier has perfectly coordinated the 63 colours and thus made them harmoniously combinable through the entire range. Impressed by the extraordinary appearance, JUNG exclusively provides light

switches in the impressive colours worldwide. The matt surface results from hand lacquering in a special process. Inscriptions using the JUNG GRAPHIC TOOL are possible. Thanks to the JUNG modular system, all covers can be combined with the LS range inserts.

LS 990 in Les Couleurs® Le Corbusier
32033 céruleén clair

KNX push-button F 40
in the range LS ZERO in matt graphite black

LS ZERO

LS ZERO is the flush-mounted new interpretation of the LS 990 classic switch. Switches, door intercoms and connections for building technology can be integrated almost flowing into the interior – ideal for installation in furniture, brickwork or drywall. With over 200 different inserts, the range provides all options

for modern building control. Elegant in white, precious metal colours or in the 63 colours of Les Couleurs® Le Corbusier. Alternatively, LS ZERO is also available in a version with an installation height of 3 millimetres for flat mounting on wallpaper.

More information can be found here: jung.group/zero

LS CUBE

SWITCH / SOCKET COMBINATION

in stainless steel look

SWITCHES / PUSH-BUTTONS

in white

F 40 PUSH-BUTTON, 4-GANG

in aluminium look

With LS CUBE, JUNG provides a modern surface mounted variant of the LS 990 design classic. LS CUBE is the optimal solution if there is no possibility of flush mounting or if surface-mounted installations are to be used as a deliberate stylistic device. The striking design of the range is ideal for open spaces

with loft character. LS CUBE particularly stands out aesthetically on exposed concrete and natural stone. But the range also looks good on rustic wooden beams. LS CUBE is available in numerous colour and material variants; the functional diversity of the range also leaves nothing to be desired.

Switches in the LS CUBE range in white

Toggle switch LS 1912, 2-gang
in aluminium

LS 1912[®]

TOGGLE LEVER AS CONE

TOGGLE LEVER AS CONE WITH LED

TOGGLE LEVER AS CYLINDER

TOGGLE LEVER AS CUBE

As a homage to the JUNG switches of the early years, the toggle switch LS 1912 brings the mechanics of switching to life in a new way. The switch mechanism is designed so that the cover closes flush with the frame. Only the toggle lever in the shape of a cylinder, cone or cube extends from the unit as a style element. LS 1912 with matt colours is particularly

suitable for a timeless and above all reduced interior design. In the version with indicator lamp, an LED in the toggle lever indicates the switching status or provides orientation. The multi push-button insert extends LS 1912 by an additional toggle switch position. The LS 1912 range can be seamlessly integrated into the JUNG systems for smart building control.

LS 1912 in Les Couleurs® Le Corbusier

Puristic design, varied colours: The JUNG toggle switch LS 1912 in the cylinder version is also available in the 63 colours of Les Couleurs® Le Corbusier. That opens up a wide range of design possibilities. In this way, a coherent overall picture arises in the room, where the electrical installation with LS 1912 inserts itself

visually into the colour scheme and the style of the interior. The hand lacquered toggle switches are produced to order. The delivery time is approx. ten weeks after receipt of order. Classic form, versatile technology: LS 1912 covers many functions as push-button, switch or as multi push-button.

LS DESIGN

SWITCH/SOCKET COMBINATION

in white

ROTARY DIMMER

in anthracite

MOTION DETECTOR

in aluminium

The frames of the LS DESIGN range made of high-quality metal or plastic appear extraordinarily light. A discreet shadow gap on the rear side makes the difference. Light switches,

sockets and push-buttons appear to float on the wall. The JUNG modular principle provides numerous possibilities to individually combine the components of the LS DESIGN range.

Smart Radio DAB+ in the
LS DESIGN range in aluminium

A range – Creativity demonstrates diversity

Set accents in the room: The modern A range provides a wealth of interesting ideas in form, colour and material that fit into any interior.

2-gang combination of
switch and SCHUKO® socket
in the A 550 range in white

A 550

ROTARY DIMMER

in white

SWITCHES/PUSH BUTTONS

in mocha

SCHUKO® SOCKET

in aluminium look

F 40 PUSH-BUTTON, 4-GANG

in matt anthracite

Concentrated on the essentials, A 550 is impressive due to a minimalist and striking design. The linear, uncompromising look of the range stands for a clear design language and perfectly complements modern furnishing styles.

In aluminium look, anthracite, mocha, champagne, black and white, and particularly in the elegant matt graphite black and matt snow white lacquers, the A 550 range sets accents.

A FLOW

SCHUKO® SOCKET

in champagne

JUNG HOME PUSH-BUTTON, 1-GANG

in black

F 40 COMPACT ROOM CONTROLLER

in aluminium look

F 50 PUSH-BUTTON, 4-GANG

in matt anthracite

Young, modern and adaptable: A FLOW remains stylish even if tastes change. With its light, harmonious design, A FLOW blends confidently into different interior styles.

The range is available in aluminium look, anthracite, mocha, champagne, black and white, and in the matt graphite black and matt snow white colours.

A CREATION

F 40 PUSH-BUTTON, 2-GANG

with frames in duroplastic in mocha

SWITCHES / PUSH-BUTTONS

with glass frame in champagne

F 50 PUSH-BUTTON, 4-GANG

with glass frame in white

SCHUKO® SOCKET WITH USB CHARGER

with frames in duroplastic in white

A CREATION is impressive thanks to its expressive design and wide choice of materials. In addition to coloured plastic frames made of duroplastic and breakproof thermoplastic, A CREATION is

also available with frames made of real glass. Due to its wide range of functions, the range covers all areas of modern electrical installation effortlessly.

KNX RF push-button and SCHUKO® socket
in the A CREATION range with glass frame in emerald green

A VIVA

JUNG HOME PUSH-BUTTON, 1-GANG

with glass frame in black

ROOM THERMOSTAT

with glass frame in crystal grey

PUSH-BUTTON, 2-GANG

with glass frame in champagne

SCHUKO® SOCKET WITH USB CHARGER

with glass frame in emerald green

A VIVA extends the A range portfolio with satin-finished glass frames. The combination of rounded edges and the satin-finished surface makes the glass look soft and breaks up the hardness of

the glass material. All covers for the A range fit on A VIVA. In particular, covers in matt colours underscore the elegant effect of A VIVA.

A CUBE

PUSH-BUTTON, 1-GANG

in white

SCHUKO® SOCKET

in aluminium look

KNX F 40 PUSH-BUTTON, 4-GANG

in matt snow white

KNX F 50 PUSH-BUTTON, 3-GANG

in matt graphite black

A CUBE is available in the six colours of A 550 and in 1-gang to 3-gang versions. Multiple combinations can be mounted both vertically and horizontally. The surface-mounted version covers all uses that do not require a deep wall

box. Accessories such as strain relief, cable and pipe inlets ensure easy mounting. With light switches, sockets and multimedia inserts, A CUBE offers a large range of functions.

SCHUKO® sockets
in the A CUBE range in matt snow white

AS 500

SWITCH / SOCKET COMBINATION

in white

ROTARY DIMMER

in white

KNX F 40 PUSH-BUTTON 3-GANG

in white

In addition to the harmonious lines of the AS 500 in ivory and white, the diffraction of the rocker surface creates a visual accent. The application spectrum includes all technical

possibilities of advanced electrical installation. The protection level IP 44 is ensured with sealing gasket. AS 500 made of breakproof thermoplastic is also available.

CD ranges – Elegance with no rough edges

Discrete colouring and an organic form define the design of the CD range. A visual special feature is the angling of the rocker surface.

CD range

SWITCHES / PUSH-BUTTONS

CD 500 in white

ROTARY DIMMER

CD 500 in platinum

1-GANG PUSH-BUTTON

CD PLUS in white / stainless steel

MOTION DETECTOR

CD SURFACE-MOUNTED in grey

Discrete colouring and an organic form define the design of the CD range. The CD 500 switch range is available in six discrete colours as well as two real metal versions in anodised aluminium. The CD PLUS range is available in the frame

colours white, light grey and black. For individual colour schemes, two types of application are available, each in thirteen colours. The lines of the CD 500 range are also impressive in the surface-mounted variant.

Living comfortably at home

Switches should not only look good, they also have to perform quite a lot. JUNG manages to bridge the gap between sophisticated design and advanced technology in an exemplary manner.

Always the right lighting

Show your home in its true light and operate or dim the lighting according to your needs: manually, or automatically to save energy.

LED UNIVERSAL TOUCH DIMMER

One for all: The LED Universal touch dimmer dims and switches all common lamps safely and conveniently. That is fit-for-the-future dimming convenience.

ROTARY DIMMERS AND CONTROLLERS

The LED universal rotary dimmer switches and dims all conventional lamps. The DALI-2 rotary controller also controls the colour temperature via Tunable White.

LED UNIVERSAL 2-GANG DIMMER

Switch and dim two luminaires independently from each other by pressing a button: Individual switch-on values can be saved separately for each LED lamp or lamp group.

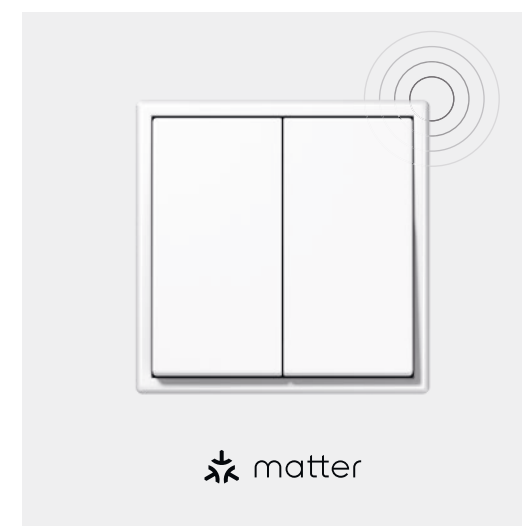

MOTION DETECTOR

Light when needed: The light is only switched on if someone is in the detection range of the motion detector – and afterwards reliably switched off again. That saves energy.

Flexible radio transmitter

JUNG radio transmitters can be installed wherever they are needed. An external power supply is not required. JUNG offers wall-mounted transmitters with EnOcean technology, with Bluetooth® Low Energy and specifically for the Philips Hue and Matter systems.

MATTER

More versatility in the smart home: the battery-supplied push-button in the JUNG design controls all Matter devices locally.

ENOCEAN

The JUNG radio transmitters with EnOcean technology do not need a cable or batteries.

BLUETOOTH® LOW ENERGY

Radio transmitters with Bluetooth® Low Energy can be integrated into the digital lighting control from Casambi.

FRIENDS OF HUE

With these JUNG radio transmitters, the Philips Hue luminaires can be easily controlled.

Matter push-button in the A 550 range in white

Controlling shading

With JUNG, you are opting for more comfort within your own four walls. To control your shutters, awnings and blinds, JUNG offers you the appropriate solution.

STANDARD CENTRE PLATE

With our intelligent push-button, you can control lighting or shading. The push-button can be actuated at the top, bottom and also full surface. The cover is available with or without symbols.

TIMER SWITCH WITH DISPLAY

The timer switch with display is suitable for the control of light and shading. The high-quality, real glass surface has an illuminated display and six sensor buttons for operation.

WEATHER STATION

With the weather sensors and converters from JUNG, you control your awnings and external shutters automatically according to the respective weather conditions. The sensors for wind, sun and rain detect changes in real time and automatically adapt the shading. Depending on the weather conditions, you can therefore enjoy pleasant shade or reliable protection when bad weather approaches.

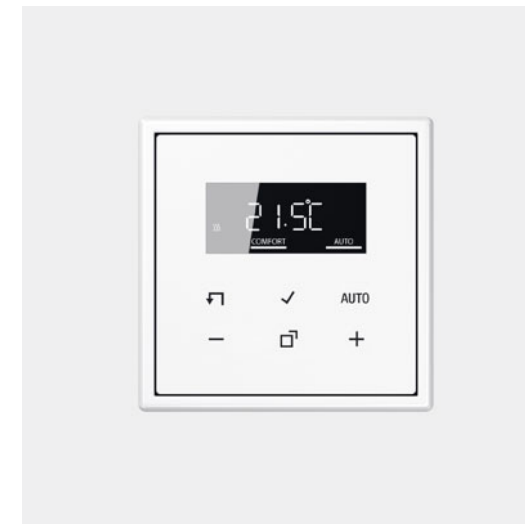

LS 990
room thermostat
in stainless steel

Control temperature

The ideal room temperature depends a great deal on individual perception. An ideal temperature control should therefore above all be flexible. Regulation of the heating for an individual room leads to more efficient use of the heating energy, better adaptation to the individual needs and thus to greater convenience.

ROOM THERMOSTAT DISPLAY

The room thermostat display controls underfloor heating systems and radiators, and allows room cooling in combination with a heat pump system.

ROOM THERMOSTAT

The four JUNG room thermostats in the same design as JUNG rotary dimmers offer heating and cooling, ECO mode and temperature drop detection. They also have an LED display and silent switching.

Safe orientation

With the LED technology, there is an orientation system that is easy to read even in the dark, sets clear signals and effectively shows the way.

JUNG offers various solutions for safe orientation: LED warning signs and pilot lights can be individually designed. With the LED orientation light, the LED light is installed flush into the design cover, the neutral white LED shines downwards in a defined light beam. Thanks to

the brightness sensor, it only illuminates when the environmental light falls below a specified threshold value. The SCHUKO® sockets with orientation light also ensure safe, non-glare orientation in the dark.

SCHUKO® socket with integrated LED floor pilot light and brightness sensor in the range LS 990

Smart Radio DAB+

SMART RADIO IN A MULTIPLE FRAME

SMART RADIO IN A SINGLE FRAME

The Smart Radio DAB+ receives programmes via FM and DAB+. It stores up to eight stations per reception mode. Operation is simple. In addition, the Bluetooth® version allows streaming of music. The wall (mounting) radio is

optionally available as mono or stereo version. With its real glass front, the Smart Radio DAB+ is also an optical highlight, available in the various frames in the JUNG design.

Smart Radio DAB+ Bluetooth®
mono set in the range LS 990 in chrome

© PHOTO: CONSTANTIN MEYER

Perfect connection

Tablet, smartphone or television have become an integral part of our lives. The JUNG components provide intelligent solutions and always the right connection for these.

DATA WALL BOXES

Reliable network connections in all parts of the building and always the correct connection with the JUNG network boxes.

FIBRE OPTICS

Fibre optic technology determines the digital future. JUNG offers colour-coded keystone modules for covers of the AS, A, CD and LS ranges.

MULTIMEDIA TERMINALS

Home cinema, game console and Full HD screen: To avoid cable clutter, there is the multimedia connection system for analogue, digital and mobile end devices.

USB CHARGER WITH USB-A+C

in LS 990 in white

USB CHARGER USB PD 60 WITH USB-C

in LS 990 in black

The JUNG SCHUKO® sockets with USB ports quickly recharge a smartphone, for example, and the socket remains free in the process. The versions with JUNG Quick Charge® have either a USB-A or USB-C port and are impres-

sive with a charging capacity up to 18 watt. USB chargers with up to 60 watt support numerous manufacturer standards for fast charging.

JUNG SCHUKO® sockets
with USB port are tested
and certified by VDE.

International socket options

| | | |
|---|---|---|
|  |  |  |
| British standard 13 A/plug type G | British standard 13 A, switched/plug type G | British Standard 13 A, switched with indicator lamp/plug type G |
|  |  |  |
| British standard 5 A/plug type M | Indian standard/plug type D, M | Chinese standard/plug type A, I |
|  |  |  |
| SCHUKO® standard/plug type F | NEMA standard/plug type B | NFC standard/plug type E |

Best worldwide connections: The JUNG modular system provides numerous international socket types according to country-specific standards. The international sockets can be implemented in almost all JUNG design ranges and can also be combined in multiple frames.

JUNG door communication

VIDEO INDOOR STATION

in LS 990 Les Couleurs® Le Corbusier
32031 céruleen vif

in LS 990 in Dark

Door communication with high standards: the JUNG video indoor stations in switch design are impressive in their functionality and appearance. Not only do they have a particularly large selection of designs, they are also perfectly compatible with Siedle

door stations thanks to the use of Siedle system technology. The advantages: easy operation and a large variety of possibilities. The JUNG indoor stations fit in harmoniously with the rest of the electrical installation in the overall design.

Motion detector 240°

The motion detector enables the control of the lighting dependent on movement and ambient brightness within an area of 240 degrees.

The detection range of the motion detector can be precisely restricted by using a push-on cover.

Ideal mounting height: two metres and at least 50 centimetres from a light source.

The JUNG motion detector 240° is connected to the mains electricity and is suitable for various lamps including LED and halogen. The manual setting of run-on time and brightness threshold is carried out using potentiometers.

The detector has a maximum range of 12 metres and a detection angle of 240°. Time and brightness can be individually set by the user. Available in white and black.

The smart home systems from JUNG

JUNG HOME push-button in
Les Couleurs® Le Corbusier
32091 rose pâle

From the intelligent socket right up to a completely networked smart home in accordance with the DIN standard: our solutions combine ease of operation and the special JUNG design. Which of the three systems is the right one for you depends on your building plans and your own requirements.

JUNG HOME smartifies both new buildings and existing ones.

The system uses the conventional 230 volt installation. Commissioning and operation are achieved very easily using Bluetooth® Mesh and the JUNG HOME app – starting from just one socket.

The flexible, wireless smart-home system: JUNG eNet SMART HOME is installed quickly and cleanly – even when retrofitting.

The great advantage of the wireless technology is, among others, that no cables have to be laid during installation and thus the walls remain undamaged. In addition, it can be extended at any time. Comprehensive scene control is achieved by using a server.

KNX networks, controls and visualises all components connected to the control cable decentrally in the building.

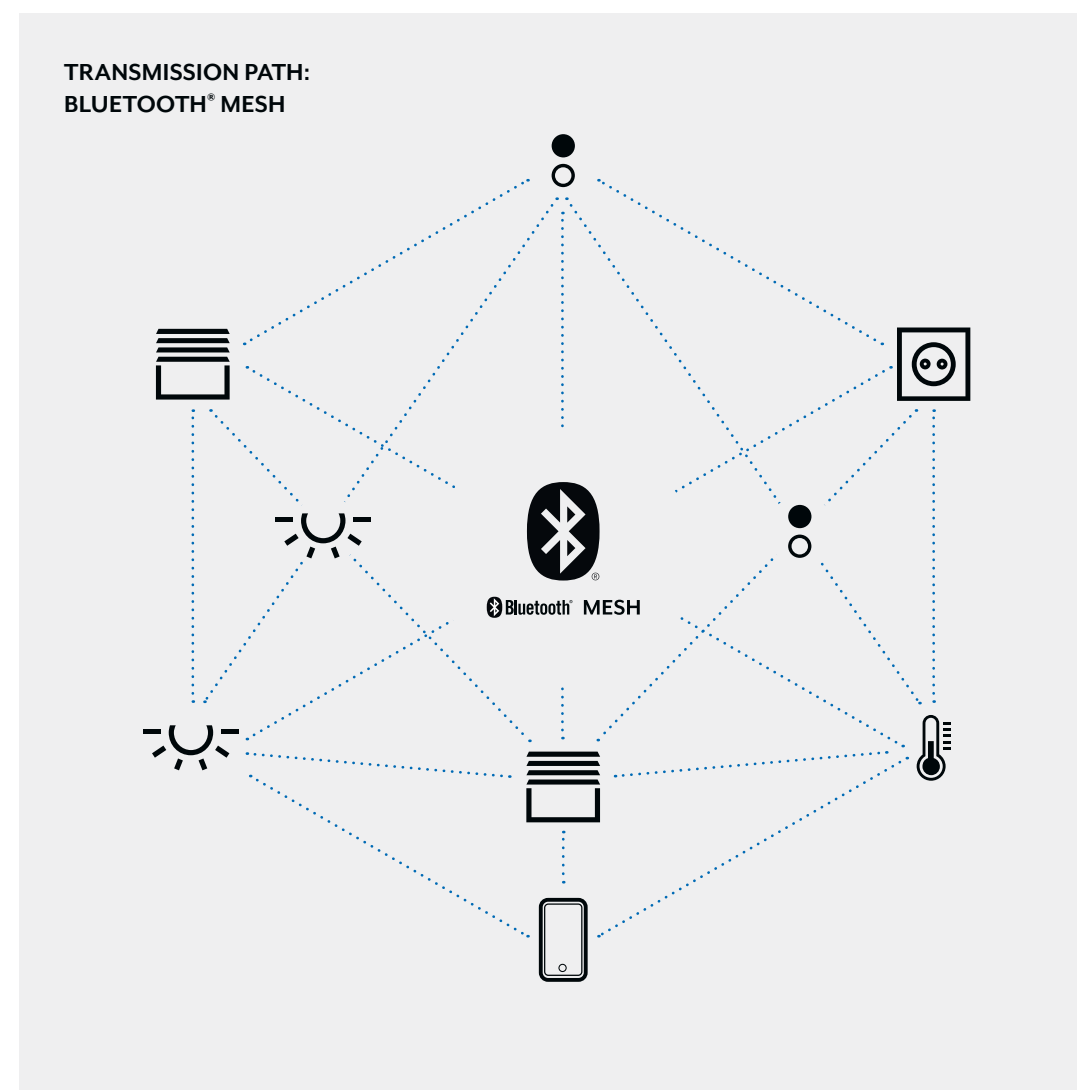

As a proven, worldwide standard, KNX is future-proof and offers alongside automation many possibilities for sustainable and efficient living. KNX is particularly suited to new buildings.

JUNG HOME. JUST SMART.

JUNG
HOME

You don't have to be an expert to make your home smart. All that is needed is the right technology. Light, shade, temperature: at its core, JUNG HOME consists of system inserts, covers and sockets. Locally networked using Bluetooth® Mesh. Commissioning and operation are carried out with the JUNG HOME app.

Operating JUNG HOME

1-GANG PUSH-BUTTON

2-GANG PUSH-BUTTONS,
BATTERY-POWERED

MOTION DETECTOR 1.1 M

ROOM THERMOSTAT DISPLAY

In the JUNG HOME, you control the functions with smart push-buttons. The push-buttons are also available as battery-operated versions and can be placed independently of the 230-volt-installation. JUNG HOME is energy-efficient, thanks to the motion and presence detectors. The motion detectors detect in a

range of 180 degrees, the presence detectors register movements in 360 degrees. And you can regulate the temperature as well in accordance with your requirements: energy efficient and simply smart. Everything networked using Bluetooth® Mesh and configured simply with the JUNG HOME app.

© PHOTO: CONSTANTIN MEYER

JUNG HOME push-button in
Les Couleurs® Le Corbusier

Smart SCHUKO® sockets

JUNG HOME SCHUKO® SOCKET ENERGY

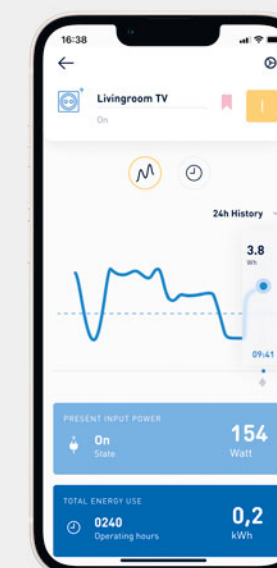

SAFETY+

STATUS LED

The LED on the socket is an on-off switch at the same time. It additionally displays the status of the socket.

JUNG HOME APP

Precise charting per hour or day: the JUNG HOME app displays the exact energy consumption.

With the JUNG HOME SCHUKO® sockets, you reduce your electricity consumption and gain in convenience and safety at the same time. The Energy version measures electricity consumption and thus allows targeted energy management. The smart sockets are switchable using JUNG HOME push-buttons, the

JUNG HOME app or using the LED push-buttons on the socket itself. The sockets have 16 time programs with astro function and automatic summer and winter time adjustment. Furthermore, they have a random function, a run-on time and a switch-on and switch-off delay.

2-gang combination of JUNG HOME switch and JUNG HOME SCHUKO® socket in the LS 990 range in white

The JUNG HOME gateway

The JUNG HOME gateway is the interface to other services and functions of different providers. That enables you to have remote access via apps and voice control of all connected devices.

Products and solutions from VELUX, Schüco, Vaillant, Sonos, Philips Hue and many other providers can be networked with the service from mediola®. Wibutler is an IoT platform for

digital building technology. It networks and controls over 300 products from more than 45 manufacturers.

JUNG HOME Plus

The connection of an existing JUNG HOME system to a Smart Visu Server offers the user many additional functions. The system is linked to the SV server via the JUNG HOME gateway.

Additional functions are for example the secure remote access, the user management, a central time controller or the control of KNX, Philips Hue, SONOS and sonoro via JUNG

HOME push-buttons and motion detectors. Both the door communication and project security can be implemented and controlled via this connection.

eNet SMART HOME

TRANSMISSION PATH:
RADIO AT 868 MHZ

Light, blinds, heating and many other functions can be conveniently controlled with eNet SMART HOME – from home or also on the move with remote access. As the manufacturer-independent system requires no cables, it can be installed quickly without having to lay cables or similar. The eNet server enables comprehensive scene control.

Control individually

Via smartphone and tablet or via a stationary touch display – with the JUNG eNet SMART HOME App, users have access to the entire building technology at all times. The various functions can be controlled easily and intuitively via a fully encrypted, VDE-certified connection. It does not matter whether you operate JUNG eNet SMART HOME at home on your own WLAN or via remote access on the move.

INTELLIGENT VOICE CONTROL

JUNG eNet SMART HOME is compatible with the Amazon Alexa and Google Assistant voice services.

ENET SMART HOME APP

At home or on the move: one finger tip is enough. The user interface of the app is adapted to iOS and Android in each case.

eNet WALL TRANSMITTERS

The battery-powered wall transmitters are simply placed where they are needed, independent of the electrical installation.

eNet RECEIVERS

The receivers are available in various designs and can be installed according to local conditions.

JUNG KNX system

TRANSMISSION PATH:
KNX BUS LINE

KNX is the only worldwide uniform standard for building automation technology, with currently 123,000 partners in 190 countries. More than 8,000 devices from over 500 manufacturers communicate with each other thanks to the KNX standard. The applications and functions are continuously extended. Connection to many other systems, protocols and standards is also possible with KNX.

The nerve centre in the smart home

JUNG SMART VISU SERVER

Smart Home makes your life easier. The compact JUNG Smart Visu Server provides even more convenience. It visualises and controls all the processes in the KNX system. Lighting, temperature, sun protection, music and more: you control all the functions via the Smart Visu Server app with a smartphone or tablet. Both at home and on the move with secured remote access. Smart Home components such as Alexa, Google Assistant, Philips Hue, Sonos, sonoro audio systems and the IoT world of

SmartThings can also be easily integrated into the system with the server. If you combine the Smart Visu Server with the JUNG HOME gateway, KNX installations can also be extended with JUNG HOME. You can thus integrate standard lamps or table lamps into scenes and the energy version of the socket clearly displays the energy consumption. KNX functions can be implemented quickly and inexpensively thanks to Smart Visu Server. The software can be updated and upgraded.

Smart building central unit

JUNG VISU PRO SERVER

The JUNG Visu Pro Server is suitable for complex KNX applications, both in the commercial as well as the private area. The universal talent provides a wide range of customisation options and maximum security.

The JUNG Visu Pro Server is the professional way to visualise and control building automation. Multiple, independent KNX systems can be operated and configured conveniently at the same time. In combination with Amazon Alexa or the Google Home Assistant, the Visu

Pro Server enables voice control of the building technology. Thanks to remote access, users can conveniently access the system while on the move. For extra security, the communication is encrypted with KNX Secure.

Intelligent voice control

The connection of KNX building technology with the Internet of Things makes the home even more convenient. Important interface: the JUNG voice control.

KNX MEETS VOICE CONTROL

Your Smart Home listens to the word, thanks to the JUNG voice control. It is the crucial interface between future-proof KNX technology and the Internet of Things: The JUNG voice control must be activated in the Smart Visu Server or Visu Pro Server so that the subsystems behind the KNX technology become speech-compatible. The connection to the voice control is very simple and can be realised quickly by the specialist for his customer. In consultation with the customer, the system integrator selects the building functions that should be controlled.

MANAGING VOICE COMMANDS

Users can customise voice commands for maximum convenience. Also subsequently. For example, an imprecise "switch on wall lamp" becomes a more specific "switch on the ceiling floodlight in the living room". However, devices outside the KNX universe can also be integrated into the voice control system by the user.

Amazon Alexa or Google Assistant do not offer their services in all languages.

Central operation using touch displays

SMART PANEL 5

127 mm / 5"

SMART CONTROL 8

203 mm / 8"

Multifunctional touch displays for intelligent buildings: the Smart Control 5 and 8 take over the control and visualization of the KNX system. Thanks to the JUNG Launcher, all available applications are clearly displayed and can be called up directly by tapping on the respective icon. In this way, operation of the building technology becomes simple and convenient.

The high-resolution graphic display of the Smart Control 5 is reminiscent of the newest smartphones in respect of its appearance, brightness of the colours and sharpness. The new JUNG Smart Control 8 is a capacitive touch display for operating all functions from door communications to controlling the smart home. The 8-inch display (20.32 cm) has an HD screen.

KNX touch display
JUNG Smart Panel 8

Central operation without a server

SMART PANEL 8

Thanks to the large symbols and font,
the display is clear and easily understood.

SMART VISION APP

With the Smart Vision app for smartphones and
tablets, you can also control the Smart Panel 8.

The Smart Panel 8 is a touch screen for direct
KNX visualisation without an additional server:
centrally on the wall and with an app for a
smartphone or tablet. The JUNG Smart Panel
8 offers comprehensive possibilities for intuitive
control of your KNX system. The app interface

is called JUNG Smart Vision and can be opera-
ted intuitively. Various rooms such as living
room, bedroom, kitchen, etc. are set up in the
main menu and provided with functions en-
tirely as you wish. The Smart Panel 8 can be
planned in at the time or added later.

KNX room controller LS TOUCH

LS TOUCH IN THE LS 990 RANGE

in stainless steel

in white

LS TOUCH IN THE LS ZERO RANGE

in Les Couleurs® Le Corbusier rouge vermillon 59

With the KNX room controller LS TOUCH, up to 32 smart home functions can be controlled within a room – from the lighting via the heating to the multimedia. The smart touch display in switch format combines simple, intuitive operation of functions with visualisation of the system. LS TOUCH is based on clear and easily understood symbols and the

operating philosophy is reminiscent of the operation of modern smartphones: the functions are called by swiping on the display. LS TOUCH is permanently connected with a 1-gang frame from the JUNG LS 990 or LS ZERO switch ranges and is available in a variety of materials and colours.

in A FLOW in aluminium look

Smart functions, stylish design: The JUNG KNX push-button F 10 looks like a classic light switch, but masters intelligent KNX technology. Operation is particularly simple: The individual switching points can be assigned multiple times and are completely customisable. Available with covers and devices from the A, AS, CD and LS ranges, the KNX push-button F 10 integrates perfectly into any interior.

KNX SECURE

Effective protection with AES128 encryption and double protection: KNX IP Secure encrypts the transmission at network layer. KNX Data Secure encrypts and authenticates the data on the KNX bus line.

KNX PUSH-BUTTON

in LS 990 in stainless steel

The KNX push-button and room controllers of the F 40 family are designed for convenient operation via their large buttons. These are used to control both the classic room functions such as lighting, shutters and temperature as well as entire feel-good scenes or multimedia components.

These can be individually marked according to your wishes and intended use using the JUNG GRAPHIC TOOL for better function allocation. Centrally arranged, coloured LEDs for operation and status display round off the easy handling.

KNX ROOM TEMPERATURE CONTROLLER

in LS 990 in aluminium

The KNX push-button F 50 in the design of the AS, A, CD and LS ranges are impressive with their homogeneous surface appearance and harmonious overall appearance. The components are uniformly designed with

operating buttons on the left and right and a large display or cover in the middle. The cover is available either as a transparent labelling area or matching the button colour.

2-gang in dark with four functions

The LS 1912 toggle switch is a homage to the beginnings of the company. In combination with a KNX push-button interface, the LS 1912 becomes a KNX control unit. It then also controls the light, the heat or the shading in a KNX system. Ideal for a smart home with a classic interior. Mounting is possible both horizontally and vertically.

Conventional gets smart

Smart living with the KNX RF radio standard (RF = radio frequency) in the JUNG design: KNX RF devices bridge structural conditions where no bus lines can or should be installed. In this way, the JUNG KNX RF push-buttons make the classic 230 volt installation smart – wireless and without additional cables needing to be

laid. At the position where a conventional light switch used to be, a smart home control unit can be found. Connected with a JUNG Server, users get a fully functional smart home including voice control, visualisation and operation with a smartphone or tablet.

The JUNG GRAPHIC TOOL

LASER ENGRAVING

The laser engraving process enables contours of symbols, texts and ornaments due to the precise removal of the surface.

COLOUR PRINTING

The abrasion-resistant colour printing provides numerous possibilities for individual design.

LABELLING

Integrated inscription fields can be designated via labelling process. This optimises the assignment of functions.

With the JUNG GRAPHIC TOOL, you can design switches, sockets, KNX push-buttons, room controllers and many other devices completely individually. You can customise all of these operating elements online with symbols, text or logos.

The JUNG GRAPHIC TOOL supports laser engraving, colour printing and identification of inscription fields. The procedure used depends on your personal demands and the individual product and material.

JUNG provides worldwide exclusive light switches, sockets and building technology systems in the 63 colours of Les Couleurs® Le Corbusier. The colours shown here on the switches from the LS 990 range are also available in the LS ZERO, LS CUBE and LS 1912 ranges.

Cradle to Cradle: a cycle where nothing is lost

The idea of circular products brings climate and resource protection together and represents an important contribution for more sustainability in the building industry. For this reason, we have subjected the most-used inserts and switch ranges for conventional and smart building technology to a comprehensive Cradle-to-Cradle certification.

Cradle to Cradle Certified® is the international standard for sustainable, circular-ready and responsible products. As the name Cradle to Cradle implies, the process involves investigating the entire value-added chain to ensure that the products have no negative influence on people and the environment in their complete product lifecycle. Evidenced by the C2C Material Health certification, no environmentally damaging chemicals are used in the products.

All certified JUNG ranges are produced using renewable energy, can be separated into material types and in this way can be added

to the recycling cycle. As confirmed by the C2C Material Health certification, no environmentally harmful chemicals are used in production.

The LS 990, AS 500, A 550, A FLOW and A CREATION ranges have been awarded the Cradle to Cradle (C2C) and Material Health certificates after a rigorous testing process.

The detailed list of certified products and the certificate itself can be viewed on the C2C website.

More information can be found here: jung.group/C2C

Multiple sustainability

In production we have relied on recycled plastic for many years. The A CREATION, A 550, A CUBE and A FLOW switch ranges in matt anthracite already consist of 95 % resource-saving recyclate. In this way, we contribute to reducing the environmental burden of plastic waste.

More information can be found here: jung.group/recyclate
